

Template Polymerization (with condensation)

Small particles

FIG. 1

Polycation Binding (with aggregation)

Aggregation and Precipitation

The image is a high-contrast, black-and-white scan of a textured surface. It is characterized by a dense, grainy pattern of black and white speckles. There are some faint, irregular white shapes scattered across the darker background, particularly in the lower half, which could be remnants of text or figures that have been heavily degraded or obscured by noise. The overall appearance is that of a heavily degraded photograph or a scan of a rough, dark material.
